With BIM quantity take-off can be conducted almost automatically given that the type of materials, their quantity and price is included in the model. It is known that construction projects often run overtime and over budget [3] and one of the reasons is lack of accuracy in
quantity takeoff and estimates.

AgilePgM has one main handbook supporting the qualification scheme, published by The DSDM Consortium,
called AgilePgM™ Agile Project Management Handbook. This can be purchased from APMG Business Books at: www.apmg-businessbooks.com. Most AgilePgM accredited training organizations (ATO) include this handbook as part of the course fee.

Agile Programme Management
Architects use computer-aided design and drafting (CADD) and building information modeling (BIM) for creating designs and construction drawings. However, hand-drawing skills are still required, especially during the conceptual stages of a project and when an architect is at a construction site.
Developed in partnership with the Change Management Institute. Our Change Management course (developed in collaboration with the Change Management Institute) is designed to help organizations and their people
manage the impact of change and provide techniques to effectively plan and implement successful transformation initiatives. Based on the Effective Change Manager's Handbook - aligned to ...

At The Korte Company, we begin the architectural design process a little differently than other Design-Builders. We use an innovative construction technology called 5D Macro Building Information Modeling (5D Macro-BIM) to model early stage design while showing data-oriented cost and schedule
estimates. All stakeholders can see, in real time, how different design solutions affect appearance ...

**Design-Build: The Complete Guide - The Korte Company**

BIM is defined and the evolution of BIM is contrasted with traditional methods. The various dimensions of BIM
throughout the project lifecycle and global, national, and regional adoption trends are presented. Other topics include benefits of BIM for design change management and potential of BIM to improve sustainability.

Building Commissioning is the professional practice that ensures buildings are delivered according to the Owner's Project Requirements (OPR). Buildings that are properly commissioned typically have fewer change orders, tend to be more energy efficient, and have lower operation and
maintenance cost.
